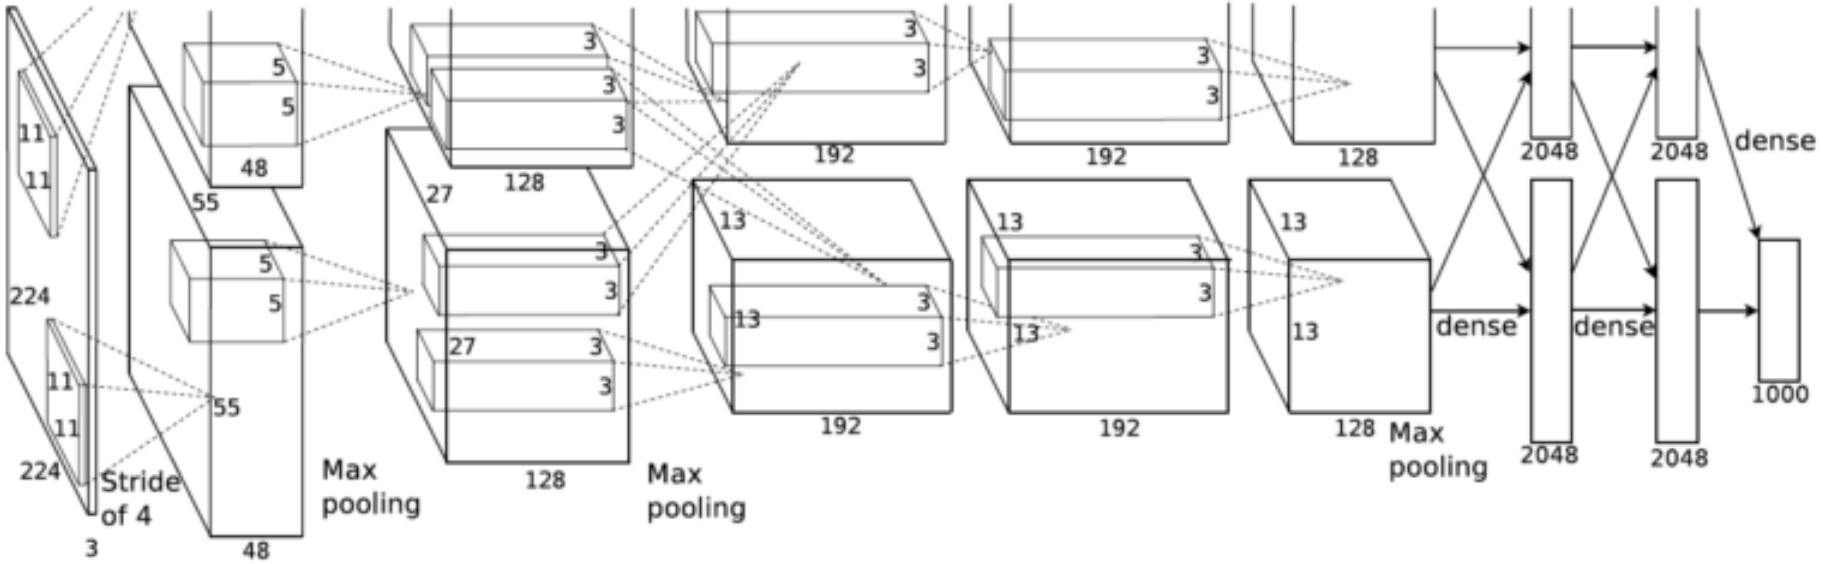
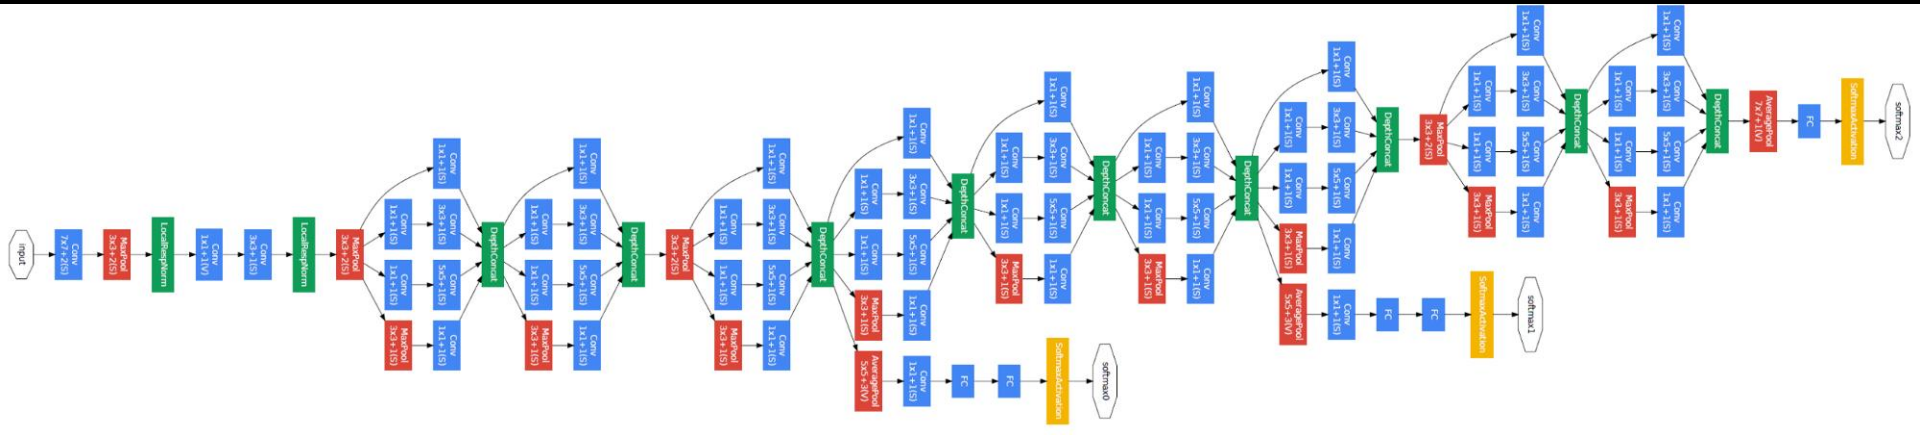
Fig. 2. Architecture of LeNet-5, a Convolutional Neural Network, here for digits recognition. Each plane is a feature map, i.e. a set of units whose weights are constrained to be identical.

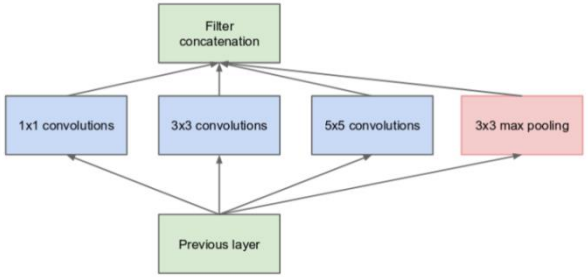
AlexNet (2012)



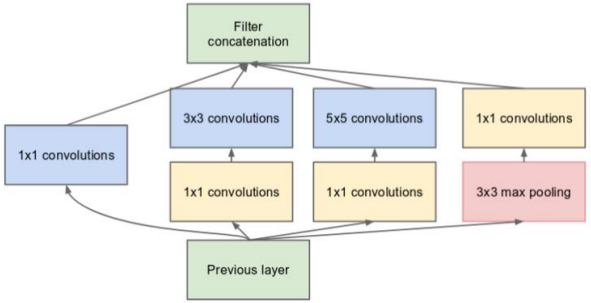
Inception (GoogLeNet) (2014)



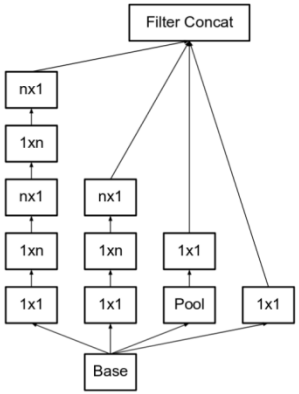
Módulos Inception

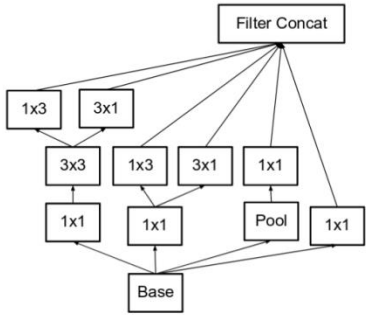


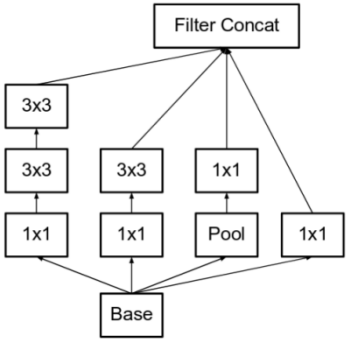
(a) Inception module, naïve version



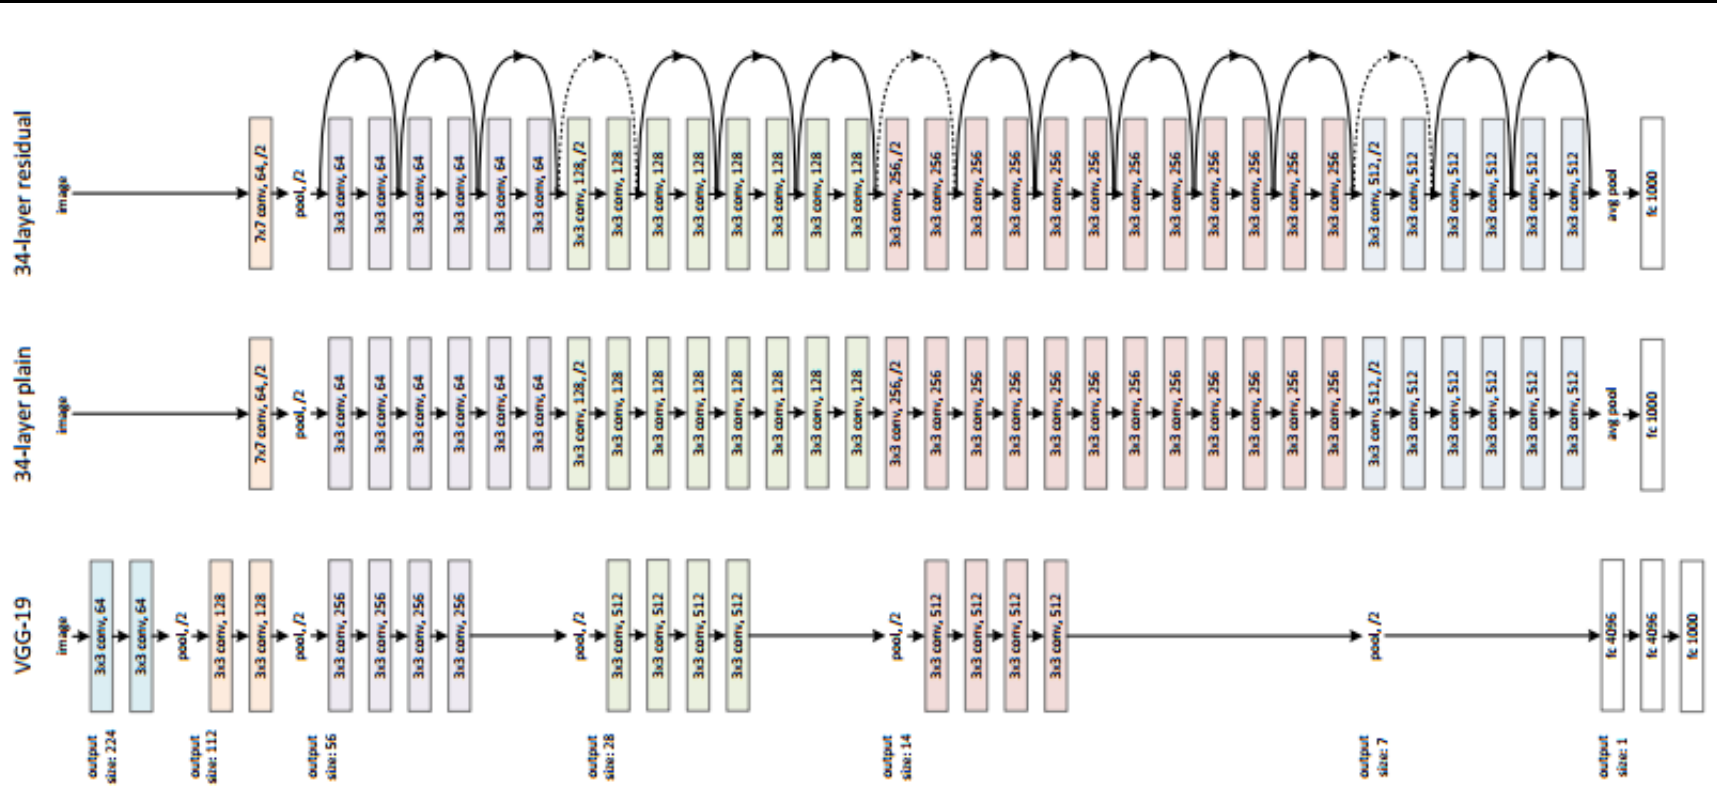
(b) Inception module with dimension reductions







VGG (2014) e ResNet (2015)



BIBLIOTECAS E AMBIENTES DE DESENVOLVIMENTO

Bibliotecas e ambientes de desenvolvimento

- O treinamento de CNNs possui alto custo computacional.
  - Recomenda-se que sejam treinados usando GPUs.
  - O Google Colab fornece acesso à GPUs (com algumas restrições).
